## Leeds West City Learning Centre

Leeds, West Yorkshire

Contact: Dave Foster - CLC Manager

**Planet PC has helped Leeds West CLC install a new, high-tech lighting rig in its TV and photographic studio.**

Leeds West CLC provides resources for students from all schools in the west of the city and collaborates with local community groups and business enterprises to enhance learning opportunities.

The new lighting rig was supplied by Planet PC and includes a range of lights and a 24-channel DMX lighting desk. Dave Foster, programme manager of Leeds West CLC, says: "The lighting rig is something we have wanted to put into place for a number of years. Prior to its installation we were using portable lights, which were unsuitable due to health and safety issues. We also felt that a permanent rig would make it much easier and quicker to set up classes, thereby allowing us to make better use of the TV studio."

Both Planet PC and Ianiro UK's technical staff worked very closely with Leeds West CLC to ensure that the equipment was correctly installed and set up. The rig is split into two, with one part designed for TV and video work and the other for photography. It enables Learning Centre staff to establish work place simulations and allows students to use the equipment for the advertising, film and TV projects that form part of their diploma studies.

Dave Foster adds, "The project required the use of the room to be multi-functioning and we feel we have achieved this important aspect through their design."

They listened to our suggestions during the procurement process and we are very happy with the end result."

Dave Foster, CLC Manager
