

## The Fallibroome Academy

### Tim Jones

*Senior Media Technician*

The Fallibroome Academy purchased a TV studio in July 2010. Tim told us “We use the equipment supplied by Planet PC to document our productions, for our Student TV station, for Media Studies students to use as part of their practical coursework and for live streaming of conferences. The benefits we have gained are that the recording of productions can now be multi-camera without the need for editing, the students gain experience of working in a live environment as camera operators, director/vision-mixers and producers, and they are also able to use the ReflecMedia to chroma key for their Media Studies coursework. Planet PC offered a professional and reliable service with the flexibility to deliver solutions to our individual needs.”
